AMENDMENT UNDER 37 C.F.R. § 1.111 Attorney Docket No.: Q63961

Application No.: 09/841,486

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

application:

LISTING OF CLAIMS:

1. (currently amended): A self-supporting stretched porous resin film which is obtained

from a compound prepared by kneading a composition consisting essentially of 30 to 100% by

weight of a thermoplastic resin comprising 5 to 100 parts by weight of a hydrophilic

thermoplastic resin per 100 parts by weight of a non-hydrophilic thermoplastic resin and 0 to

70% by weight of at least one of an inorganic fine powder and an organic fine powder in an

intermeshing twin-screw extruder at a screw shear rate of 300 sec<sup>-1</sup> or higher and which has a

liquid absorbing capacity of 0.5 ml/m<sup>2</sup>-or-more-3 to 2600 ml/m<sup>2</sup> as measured in accordance with

the method specified in Japan TAPPI Standard No. 51-87.

2. (original): The porous resin film according to claim 1, which has an average contact

angle of 110° or less with water.

3. (original): The porous resin film according to claim 2, wherein the difference between

the maximum and the minimum contact angles with water is 30° or less.

4. (original): The porous resin film according to claim 1, which has a porosity of 10% or

more.

2

AMENDMENT UNDER 37 C.F.R. § 1.111 Attorney Docket No.: Q63961

Application No.: 09/841,486

5. (original): The porous resin film according to claim 4, which has  $1 \times 10^6$  or more

pores per m2 on the surface thereof.

6. (original): The porous resin film according to claim 1, wherein said inorganic or

organic powder has an average particle size of 0.01 to 20 μm.

7. (canceled)

8. (previously presented): The porous resin film according to claim 1, wherein said

non-hydrophilic thermoplastic resin is a polyolefin resin.

9. (previously presented): The porous resin film according to claim 1, wherein said

hydrophilic thermoplastic resin is capable of dissolving in water or absorbing 5 g/g or more of

water in 30 minutes.

10. (original): The porous resin film according to claim 9, wherein said hydrophilic

thermoplastic resin is an alkylene oxide polymer.

11. (original): The porous resin film according to claim 10, wherein said alkylene oxide

polymer is a reaction product of an alkylene oxide compound and a dicarboxylic acid compound.

12. (canceled).

3

Attorney Docket No.: Q63961

AMENDMENT UNDER 37 C.F.R. § 1.111

Application No.: 09/841,486

13. (original): A laminate comprising a base layer having on at least one side thereof the porous resin film set forth in claim 1.

14. (original): A liquid absorber comprising the porous resin film set forth in claim 1.

15. (original): A liquid absorber comprising the laminate set forth in claim 13.

16. (original): A recording medium comprising the porous resin film set forth in claim 1.

17. (original): A recording medium comprising the laminate set forth in claim 13.

18. (original): An ink jet recording medium comprising the porous resin film set forth in claim 1.

19. (original): An ink jet recording medium comprising the laminate set forth in claim 13.

20. (original): An ink jet recording medium comprising the porous resin film set forth in claim 1 and a colorant fixing layer provided on at least one side of said porous resin film.

AMENDMENT UNDER 37 C.F.R. § 1.111 Application No.: 09/841,486 Attorney Docket No.: Q63961

21. (original): An ink jet recording medium comprising the laminate set forth in claim

13 and a colorant fixing layer provided on the porous resin film provided on one side of said base layer or on both the porous films provided on both sides of said base layer.
